FULLY GUARANTEED All animals will carry a standard breeding guarantee as specified by the Canadian Simmental Association. At no time shall the seller's liability exceed the purchased price of the animal.

HOMOZYGOUS TESTING Many bulls have been Homozygous Polled & Homozygous Black tested. Results will be done prior to sale.

TERMS OF SALE & IN-HERD SEMEN All bulls sell under the standard terms and conditions as set forth by the Canadian Simmental Association, copies will be available on sale day. All bulls sell in their entirety but Deeg reserves the right to collect semen on any bull that is offered in the sale for in herd use only. This is at Deeg's cost and the buyer's convenience.

DELIVERY AND BOARD Each animal becomes the risk of the purchaser as soon as it is sold. Insurance is available sale day. Bulls staying at Deeg's for later delivery SHOULD be insured. Free Delivery to central points in Western Canada. Bulls may be kept at Deeg's free of charge until May 1st. If you wish to pick your bull up we ask you to do so the following week. Bulls picked up before April 1st will receive \$100 discount on your purchase(s).

CATALOGUE INFORMATION EPD's are current and up-to-date as of publication date. Information in this document is believed to be accurate but any updates from the auction block will take precedence. All information has been supplied by the seller.

SALE VIDEOS : Videos of all lots will be available on CattleVids.ca early February. This will be a video sale format with the bulls and heifers penned close to sale barn.

WELCOME FROM SALES MANAGEMENT

The Deeg family has built a highly respected program that has been breeding quality Simmentals since 1973. Decades of selective breeding has gone into this impressive set of sale cattle and they are offering up the very best this program has produced. Roger and Dave founded this herd and have always been a stickler for quality genetics, while investing the top end cattle for decades on end that has bred consistency. More recently, we have seen Jordan and Katie take on a impactful roll and the entire Deeg family has certainly built a highly respected herd. After many years of successfully selling with the Hadway family in Olds, they are moving the sale home. We know the mutual decision was very positive for both sides to showcase their sales separately on farm for the future.

48 years of breeding Simmental cattle is impressive, and this family spares no expense to acquire the best genetics. The herd sire battery is as strong at Deeg's as anywhere in the Canada, where they truly invest in the best bulls available. By annually incorporating into many of the best females as well, it has risen this cowherd to one of the most productive in the breed. Their attention to detail on their investments has shined through on this set of sale cattle where customers can be assured they are getting a superior product. The Deeg family has confidence in this

offering and stand behind their product 100%, so you can invest in confidence as they fully stand behind them.

The Deeg family is a prime example of what makes this business so enjoyable; they are great to work with, and provide a high quality product to the industry for us to market. They are picky on feet, udders and structural integrity to ensure you can buy a Deeg animal that will provide longevity and overall profitability for your investment. We encourage you to contact them to discuss the offering as they are very honest about the appraisal and main goal is to get you genetics that will compliment your program. We hope you can join us at the farm in Strathmore, but if you can't make it sale day, feel free to reach out to any of the staff and we will represent your needs in a professional manner. The hospitality and cattle quality from the Deeg family is second to none. They are great people to work with and we highly recommend you studying this catalogue closely as it is an impressive line-up.

Best regards,

The Bohrson Marketing team

BOHRSON
 MARKETING SERVICES

WELCOME FROM THE DEEG FAMILY

It is with great anticipation that we welcome you to the 2021 edition of our Bull & Female Sale. The past 17 years have been extremely rewarding with the Hadway family full of great memories working together as well as growing our programs and more importantly our families! We would like to thank the Hadways for a great partnership and we are looking forward to seeing how both operations continue to grow with the next generation! 2020 included a lot more family time and we are thankful to have the kids involved in everything. As we are writing this Dane just turned 7, Brynn's 5 and Allie's 1, we know that the future of our operation will be in good hands and it makes us extremely thankful to be a part of the ag industry.

This year's sale will be held at home and the animals will be on display in their home environment. We are very high on the bulls on offer this year, with something in the pen to hopefully suit most needs. There is a nice split between reds and blacks with a good cross section of performance and calving ease. Over the last few years, we have keyed heavily on udder quality, foot structure and docility. Each year we invest heavily in walking herd sires, along with the use of proven AI bulls, we

also implant a group of embryos from our elite donors. This year again we will be offering a small but powerful group of heifers, they are small in numbers but they are as complete a set as we have offered in the spring to date. We have three red half blood heifers on offer that come from our partnership with Bryan & Sherry Mackenzie. They are out of top bulls raised by us and used on their purebred red angus females. We are working together to raise excellent papered halfblood females to use in our own herds as well as offering the top end up for sale.

We work closely with Trouw Nutrition to analyze all feed samples and develop a TMR ration consisting of a high roughage diet of chopped hay and barley silage with a pellet containing protein, chelated minerals, rumensin, and probiotics for the bulls. We also continue to work closely with Dr Waylon Wise of CCHMS on the overall herd health of bulls, please take a look at what all the bulls receive on page 3.

We would like to thank everyone that has purchased a bull or female from us in the past, without your support and confidence in our program we wouldn't be able to do what we love or be a part of this incredible industry.

Feel free to stop by the farm anytime between now and sale day to appraise the offering, have a visit and a coffee. We look forward to catching up with you on sale day and if you are unable to attend please contact one of us or one of the capable sales staff. The sale will be broadcast for your viewing or bidding pleasure on DLMS.

Thank you again,

The Deeg's

WWW.DEEGSIMMENTAL.COM

Cow/Calf Health and Management Solutions (CCHMS) works together with Deeg Simmental to manage their entire herd through an integrated and comprehensive health, nutrition and production management program. Detailed data is collected on each individual animal at all key health and production points and is kept in a secure web-enabled database called Herdtrax®. We continually monitor and audit this data and use this information to improve the health, welfare, performance and efficiency of the entire operation.

Disease Prevention

Deeg Simmental follows a detailed vaccination program to help ensure that the cattle stay healthy and continue to thrive after they're delivered.

Calves are vaccinated within the first 10 days of life:

- IBR/PI3/BRSV (MLV) – Inforce 3® (intransal)

Calves are vaccinated in the spring prior to pasture turnout with the following:

- IBR/PI3/BRSV (MLV) – Inforce 3® (intransal)
- BVD (MLV) and Mannhaemia hemolytica – One Shot® BVD
- 7 way Clostridial and Histophilus Somnus – Ultrabac® 7/ Somnubac®

Calves are vaccinated at weaning with the following:

- IBR/PI3/BRSV/BVD (MLV) and Mannhaemia – Bovi-Shield® GOLD One Shot®
- 7 way Clostridial and Histophilus Somnus – Ultrabac® 7/ Somnubac®
- Parasite Control – Safe-Guard® initially, followed by Ivermectin in fall.

Replacement heifers are vaccinated pre-breeding:

- IBR/PI3/BRSV/BVD (MLV) – Bovi-Shield® GOLD FP®5 (Fetal Protection)

Cows, bred heifers, bulls are annually vaccinated post-breeding:

- IBR/PI3/BRSV/BVD (Killed) – CattleMaster® GOLD FP®5 (Fetal Protection)

Bulls prior to the sale have been vaccinated and treated with the following:

- Fusobacterium Necrophorum – Fusoguard™ (footrot and liver abscess vaccine)
- Two doses given twice 60 days apart
- Lice Control – Permethrin

Bulls prior to the delivery will be boosted, and ready for turnout:

- IBR/PI3/BRSV/BVD – Bovi-Shield® GOLD FP®5

Breeding Soundness Examination

Each bull has passed an extensive Bull Soundness Examination which includes soundness of structure, palpation of testis and internal sex glands, scrotal circumference, examination of the penis as well as verifying sufficient sperm motility and morphology. Bulls that are considered to be Satisfactory if they have already passed the above criteria at sale time. [Those bulls that are deemed as “Decision Deferred” are either prepubertal or stressed and are showing sufficient signs of improvement and likely will be satisfactory as soon as the days get longer and the grass get greener. There is considerable selection pressure placed on young bulls and 30% of all bulls will fail to produce an adequate sample at 12 mo., 15% at 14 mo., 5% at 16 mo. None of the decision deferred bulls will be delivered until they prove to be satisfactory breeder]

CCHMS is proud to work with Deeg Simmental and if there are any questions please contact me and I can always find the time to talk about cows, bulls and the Canadian cattle industry.

Congrats on another outstanding pen of bulls!

Dr. Waylon Wise BSc. Ag, DVM

LOT 45 1/2 SIMANGUS - POLLED - BLACK

- Easy to appreciate this Grimley son for his attractive look, extra length of body and good amount of muscle shape
- His dam is a Cobra granddaughter from the Outlaw program
- She is structurally correct and will be a solid producer

LOT 46 7/8 SIMANGUS - POLLED - BLACK

- Definite heifer bull candidate here! Super smooth in his make up with some substance to him
- We have a bunch of Gold Key calves on the ground this year and they come easy and have explosive amounts of vigour
- Muirheads Blk Sass 193F is very feminine and angular plus has extra extension through her front third

46 **DEEG MR 168H #1336498 - RDD 168H - Feb 15, 2020**

LOT 48 PB SIMM - POLLED - RED

- Tayla was a favourite all summer and almost brought her in for FNL, glad we didn't and could offer her at our first sale at home.
- There is a lot to appreciate about her no matter the angle. Wide based, big rib shape and depth while remaining feminine
- Her modest dam has a power stacked pedigree on the bottom with a balance of calving ease on top
- Cobra strikes again here with another top quality productive daughter

LOT 51 1/2 SIMANGUS - POLLED - RED

- I would take a whole pen like this heifer any day of the week! Super well balanced and hard to fault, she is as good on the ground as she is throughout
- 255A is an ET daughter of Brylor's famous Lakme 70M donor cow, she produced herd bulls Pasquale & Richter. The 2009 Canadian show cow of the year was also a daughter of hers.
- 255A herself produced Brylor's 50th Anniversary bull sale high seller at \$23,000 to Camo in Manitoba
